

Features & Benefits

- Auto-detection 0-10Vdc or 4-20mA output, 3-wire only
- Fully configurable LCD Display
- Resistive temperature output option
- Set point and Momentary switch options
- No jumpers or DIP-switches to select output type

Technical Overview

The GS-AQ-x-UN range offers a cost-effective single output for air quality measurement. These can also include a combination of familiar passive options such as temperature, set point adjustment & momentary switch plus an LCD display. A unique feature of the sensor is its ability to automatically detect what sort of controller input it is connected to, 4-20mA or 0-10Vdc, removing the requirement for output jumpers which can be inadvertently set incorrectly. Just connect it to the controller input and it does the rest. PCB LED indication of which output type is in operation is provided, with diagnostic LED patterns for determining faults.

Specification

Active outputs	0-10Vdc or 4-20mA (3-wire) self-detecting
Environmental Housing	0 to 50°C, 0 to 95% RH non-condensing
Gross Weight (kg)	0.20
Housing dimensions	115 x 85 x 30mm
Housing material	ABS (flame retardant)
Optional passive output	PTC/NTC Element Any Sontay resistive type
Output range	0 to 100% (0=good / 100=poor)
Override optional passive outputs	VFC
Power supply	24Vac/dc $\pm 10\%$
Protection	IP30
Setpoint optional passive outputs	1-11k Ω
Weight	200g

Technical Specification

Optional passive output	PTC/NTC Element Any Sontay resistive type
Housing dimensions	115 x 85 x 30mm
Weight	200g
Housing material	ABS (flame retardant)
