

Features & Benefits

- Low cost solution
- Easy to install
- Reliable switching

Technical Overview

A range of level switches designed for high and low liquid level detection. Units consist of a lever arm reed switch assembly and a tank fixing boss. The LS-S types are for side mounting, type 1 switches fit from the inside of the tank and tighten on to a back nut whilst the type 2+3 switches mount from the outside into a tapered boss.

Specification

Gross Weight (kg)	0.02
Operating range	-20 to +80°C
Switch Rating	230Vac/200Vdc@0.5A max.
Weight	120g max.

Technical Specification

Operating range	-20 to +80°C
Weight	120g max.
Material	Polypropylene
