

### Features & Benefits

- Switch live output
- Easy adjustment
- LED indication of output status

### Technical Overview

The OC-C-M is an active motion detector for direct ceiling mounting. It emits high-frequency electro-magnetic wave (5.8GHz). It detects the change in echo from even the slightest movement in its detection zone.

### Specification

|                           |                                      |
|---------------------------|--------------------------------------|
| Ambient relative humidity | 0 to 90% RH non-condensing           |
| Ambient Temperature Range | -10 to +40°C                         |
| Coverage                  | 1 to 8 meters radius (adjustable)    |
| Dimensions                | 95mm x 40mm (H)                      |
| Field Of View             | 360°                                 |
| Gross Weight (kg)         | 0.14                                 |
| Off Delay Timer           | 8 seconds to 12 minutes              |
| Protection                | IP30                                 |
| Sensor Type               | Microwave, 5.8GHz CW radar, ISM band |
| Supply                    | 220-240Vac @ 50/60Hz                 |
| Weight                    | 140g                                 |
